## Our organizational science-based emissions reduction targets:

In 2023, News Corp's near-term and long-term goals to reach net zero carbon emissions by fiscal 2050 or earlier were reviewed and validated against the SBTi's Corporate Net-Zero Standard.

SBT Type	Pathway	Target Year	Verifier Name
Near term	1.5 degrees C	65% reduction in Scopes 1 and 2 (market-based) GHG emissions by 2030, from a 2016 base year	SBTi
Near term	1.5 degrees C	25% reduction in Scope 3 GHG emissions by 2030, from a 2021 base year	SBTi
Long term	1.5 degrees C	Net Zero GHG emissions by 2050 or earlier	SBTi

## Information regarding organizational progress toward net zero and carbon neutral goals:

Each year, News Corp measures and publicly reports the carbon footprint of our global operations. The data collection and calculation for greenhouse gas emissions related to our environmental initiatives has been overseen by third-party consultants (previously at Deloitte and now at Benchmark ESG) and independently verified by Cventure LLC since 2017 (for fiscal 2016).

Climate Active has certified REA Group's carbon neutrality claims and emissions data for REA Group's owned and operated business operations in Australia and India as provided in the table below.
